

Overview

Colors On Parade

Founded in 1988 by Robert Lowery, Colors on Parade began with a vision to provide the automotive industry with body shop quality repairs from a mobile unit that allows services to be conducted on the customer's own site, while maintaining cost-effective pricing. Lowery used his passion for restoring classic cars to perfect a patented process used by Colors on Parade and currently, he holds seven patents related to the automotive appearance restoration field.

In 1988, Colors on Parade began operating in South Carolina and in 1991, the first franchise opened in North Carolina. Since then, Colors on Parade continues to expand with new franchises and currently has locations in 31 states nationwide.

Colors on Parade uses patented eco-friendly technologies that allow the company's more than 200 professional technicians to provide mobile onsite auto repair services at any location including client's home or work. Colors on Parade's customer base include car dealerships, fleet owners, rental car agencies, body shops and recently, individual vehicle owners. Colors on Parade offers a variety of services including paint scratches, scrapes, dents, dings and paintless dent repair.

Colors on Parade continues its success with multiple awards, including honors from *Entrepreneur Magazine* that included the company on its "Top 50 Franchises," "Top Home-Based Franchises," "Top Low-Cost Franchises," and "America's Top Global Franchises" lists. Also, *Success Magazine* named the company to its "Franchise Gold 200" list.
